Build a Band Saw Box

When: **Saturday, May 3, 2025 from 8:30 to Noon &**
Saturday May 10, 2025 from 8:30 to Noon

Where: **Roger McCoy's Shop**
1514 W. Tenaya, Fresno

Cost: **$100 (Includes wood for box, two 12" wooden hand-screw clamps, and a bottle of glue with roller)**

Instructors: Roger McCoy & George Alexander

Class Description:
Join Roger and George in a class to build a band saw box based on designs from Lois Keener Ventura's book "*Building Beautiful Boxes with Your Band Saw*". While some steps of the construction of the band saw box will be done in the class, the class will consist primarily of lectures and demonstrations with the understanding that each participant in the class will duplicate the steps in their own shop before the next session of the class. This will require that participants own, or have access to, a band saw. In addition to learning how to build a band saw box, the class will touch on related topics such as techniques for properly milling of project pieces, band saw set-up and maintenance, band saw cutting techniques, sanding techniques, finishing, flocking the inside of the drawers, etc. The class will be geared toward the beginner to intermediate woodworker.

Class Size:
Class size will be limited to the first 10 students who sign-up and submit payment for the class. If more than 10 sign-up, a waiting list will be created in case of cancellations or a possible second class in the future. To sign up for the class, download and complete an application found at the club's web site www.sjfwa.com.

Questions regarding the class should be directed to Roger McCoy at 559 436-1688 or via email at rogermccoy@comcast.net.
